From flight dynamics +
control to distributed
systems software

Work on hard problems
today to make the future a
little bit brighter

Always learning and
tinkering with projects to
make life better

About Me

Code is core to many aspects of daily life - my responsibility is to use it to make the world a better place.

Experience

Chainlink Labs

Senior Software Engineer *Remote* *December 2024 - Current*
Led and consulted for new product integrations as an SME on the Solana blockchain.
Developed economic mechanisms for maintaining the Chainlink ecosystem.

Software Engineer *Remote* *May 2022 - December 2024*
Scaled team capacity to build across multiple non-compatible blockchain networks.

Entry-Level Software Engineer *Remote* *March 2021 - May 2022*
Quickly learned new contexts to deploy products across many new blockchains (EVM + nonEVM) and technology stacks (onchain, infra/laC, distributed systems).

Conflux Network

Research Engineer *Toronto, ON* *April 2020 - January 2021*
Scoped and created various technical demonstrations of decentralized technology.
Grew the developer community through hackathons, workshops, etc.

University of Michigan College of Engineering

Programmer *Remote* *April 2019 - April 2020*
Data visualization of optimization concepts for a textbook (link) using LaTeX and python.

Graduate Student Instructor *Ann Arbor, MI* *Sep 2017 - April 2018, September 2018 - December 2018*
Assisted in teaching 2nd-year and 4th-year students engineering design concepts through lab work.

Skills

Code: Go, Rust, Javascript/Typescript, React, PostgreSQL, Solidity, Nix, Python

Development: git, full-stack, linux/mac/windows, agile development, docker/containers, CI/CD,

Education

George Brown College

Blockchain Development Program *Toronto, ON* *September 2019 - August 2020*
Full-stack and blockchain development using Ethereum and Hyperledger Fabric.

University of Michigan

Masters in Aerospace Engineering *Ann Arbor, MI* *January 2018 - December 2018*
Specialization in flight dynamics and control.
Course work completed in numerical optimization and non-linear control.

Bachelor in Aerospace Engineering *Ann Arbor, MI* *September 2014 - December 2017*
Focused on aircraft structural design and dynamics + control.
Minor in electrical engineering (control systems)
